

TB200 SINGLE PURGE TB205 DUAL PURGE EFC GUN TEST BENCH

The EFC Gun Test Bench is designed to fully test Single or Dual Purge EFC “E” Series Gun Systems along with the Sames® 500 Series Gun Systems. This mobile unit has the following:

- Sturdy, stainless steel construction.
- Heavy duty, dual wheeled casters for ease of mobility.
- A lockable front cabinet that allows for easy access to internal hardware.
- A hinged lid for quick, easy access to internal hardware.
- A programmable, digital readout flowmeter with flow sensor.
- A regulator and pressure gauge for all fluids entering the gun system.
- Internal moisture separator for incoming air supply.
- Grounding strap.
- 110 volt power.

FRONT PANEL SPECIFICATIONS

The top panel contains the following features:

- Main power switch.
- On / off switches for Pilot Trigger and Pilot Dump.
- Independent regulators for Atomizing Air, Fan Air, Pilot Trigger, Pilot Dump, Pilot Regulator.
- Each regulator is accompanied by it's own 0-100 psi pressure gauge.
- Flow meter with 0-1000 cc/min
- Voltage 0-100 kV; 0-250 micro Amps
- Fault Indicator for:
 - Voltage
 - Current
 - Line

*Note: Never apply voltage with fluid in system. Only apply voltage with air in fluid lines. Only use water when testing gun triggering, dumping and spray patterns.

Consult factory for additional technical information.
